Comparison of Printed Reports and Summary Tapes

A number of advantages and disadvantages of printed reports and summary tapes as data products have been described in the Users' Guide. One of the advantages cited for 1970 census summary tapes is that they will include greater subject and geographical detail than will be available in printed reports. Since the data content of these products may be an important factor in deciding whether tapes or printed reports will be best suited to the user's purposes, it is a subject which deserves further consideration.

Hundreds of tabulations for various geographical combinations and levels will be available on tape, and many of these, generally presented with declining amounts of detail in moving from larger to smaller areas, will appear in printed reports. As a result, it is not practical to attempt a presentation which details the differences in content. The objective here is to provide a summary of the content of these products to answer the more general questions which users are likely to have (see table 1).

The following material describes some data products not yet finalized. However, if changes occur, they should not be sufficient to significantly affect this summary.

Also, concerning printed materials, attention is limited to those final reports which are the primary printed source of data for smallareas. Following the reporting pattern planned for the 1970 census, they are:

Census of the Population, Vol. I, "Characteristics of the Population," Parts 2-57, Chapters A, B, C, and D. (Notation: PC(1)-2A, PC(1)-5B, etc.)

Census of Housing, Vol. I, "States and Small Areas," Parts 2-55. (Notation: HC(1)-2, HC(1)-3, etc.)

Census of Housing, Vol. II, "Metropolitan Housing," Chapters 2-55. (Notation: HC(2)-2, HC(2)-3, etc.)

Census of Housing, Vol. III, Part A, "Block Statistics," (Notation: HC(3)-1A, HC(3)-1B, etc.)

Censuses of Population and Housing, "Census Tract Report," Number 1, 2,.... (Notation: PHC(1)-1, PHC(2)-2, etc.)

In considering the following material, users should keep two points in mind: (1) Tables in the published reports are shown inconsiderably less detail than the corresponding data on the summary tapes; and (2) small-area data presented on tapes can be combined to create summaries for larger, census-recognized areas when the summaries are omitted from the tape. However, because data items for small areas are often suppressed to preserve confidentiality, summaries for larger areas may be affected by this suppression.

1970 Population Census Data

I. First Count Data

A. Printed Reports (Census of Population, Vol. I, Parts 2-57, Chapter A).

- 1. Geographical areas represented: States (or outlying areas) and counties and their urban and rural parts; places grouped by size, urban-rural, SMSA-non SMSA, and incorporated-unincorporated categories; incorporated places; unincorporated places of 1,000 or more; annexed areas; minor civil divisions or census county divisions; component parts of urbanized areas and SMSA's.
- 2. Data published: Total population counts for the areas cited; also, selected data from past censuses, area in square miles for counties, and certain derivable percentages.
- B. Summary Tapes (see Data Access Description, CT-2, First Count Summary Tape).
 - 1. Geographical areas presented: States, counties, Congressional Districts, minor civil divisions or census county divisions, places, and enumeration districts or blockgroups. As noted earlier, tract data, for example, are accessible by aggregating appropriate blockgroups or enumeration

- districts. However, totals may be affected by suppression at the BG or ED level.
- 2. Data tabulated: Complete-count (100 percent) data for total population, age, sex, race, marital status, relationship to household head, family type, and combinations of these. Historical, percentage, and land area data are not included.

II. Second Count Data

- A. Printed Reports (Census of Population, Vol. I, Parts 2-57, Chapter B; and "Census Tract Reports").
 - 1. Geographical areas represented: (1) In Chapter B: States (or outlying areas) and counties and their urban and rural parts; places grouped by size, urban-rural, and metropolitan-nonmetropolitan categories; SMSA's, urbanized areas, places of 1,000 or more, and minor civil divisions or census county divisions; (2) in "Census Tract Reports": SMSA's counties, places of 25,000 or more population, and tracts.
 - 2. Data published: For all or part of the above areas counts are given by sex, race, age, marital status, relationship to head of household, type of family, and combinations of these. Table 2 shows the 100-percent population items included in tract reports, as well as sample items. The 100-percent items are drawn from the Second Count.
- B. Summary Tapes (see Data Access Description, CT-3, Second Count Summary Tape).
 - 1. Geographical areas represented: States, SMSA's, urbanized areas, counties, places, minor civil divisions or census county division, and tracts.
 - 2. Data tabulated: Tabulations involve the same data types as for printed reports, but include more detail, e.g., more racial categories, single years of age through 99, and cross-tabulation by total, white, and Negro.

III. Third Count Data

- A. Printed Reports (Census of Housing, Vol. III, A "Block Statistics.") (see table 5)
 - 1. Geographical areas represented: Blocks and tracts within urbanized areas and within other areas that have contracted for block statistics.

- 2. Data published: Total population, and percent of total population which is (1) Negro, (2) in group quarters, (3) under 18 years old, and (4) 62 years old and over.
- B. Summary Tapes (see Data Access Description, CT-4, Third Count Summary Tape).
 - 1. Geographical areas represented: Blocks and tracts within urbanized areas and within other areas that have contracted for blocks statistics.
 - 2. Data tabulated: Total population by race (white, Negro, and other) and sex, age and sex (21 age categories), and relationship to household head; population 14 and over by marital status and sex; population under 18 by relationship to household head and type of household.

IV. Fourth Count Data

- A. Printed Reports (Census of Population, Vol. I, Parts 2-57, Chapter C; and "Census Tract Reports"). (See tables 2, 3, and 4.)
 - 1. Geographical areas represented: (1) In Chapter C: States and their urban and rural parts, SMSA's, urbanized areas, urban places, counties, and rural farm and rural nonfarm population of counties; (2) in "Census Tract Reports": SMSA's, counties, places of 25,000 or more population, and tracts.
 - 2. Data published: See table 2 for a listing of the characteristics shown for each geographical level. Each characteristic may represent more than one tabulation. Also, it should be kept in mind that the range of information presented generally contracts as the size of the areas decreases. For example, the means of transportation to work tabulation for tracts contains six response categories, instead of nine as presented for larger areas.
- B. Summary Tapes (see Data Access Description, CT-5, Fourth Count Summary Tape.)
 - 1. Geographical areas represented: States, SMSA's and component parts, counties, places, minor civil divisions or census county divisions, and tracts.
 - 2. Data tabulated: Characteristics described are the same as in printed reports

(see table 2). Several additional tabulations appear. For example: Total population by citizenship status (native, naturalized, alien) for particular age categories, and total males 16 and over in the experienced civilian labor force by six occupational categories and their total for 13 income ranges. For all geographical levels, each item will be tabulated by total, white, Negro, Spanish-American; urban, rural nonfarm, and rural farm.

V. Fifth Count Data

- A. No printed reports will be derived from the file.
- B. Summary Tapes (see Data Access Description, Fifth Count Summary Tapes).
 - 1. Geographical areas represented: 5-digit level ZIP areas in SMSA's, and 3-digit level elsewhere.
 - 2. Data tabulated: Population counts for areas cited given by sex, age, and race; income by race and size of family; characteristic of families by low income status.

VI. Sixth Count Data

- A. Printed Reports (Census of Population, Vol. I, Parts 2-57, Chapter D).
 - 1. Geographical areas represented: SMSA's, central cities, and places of 50,000 or more population.
 - 2. Data published: Sample population items presented in considerable detail and cross-tabulated by age, race, and other characteristics.
- B. Summary Tapes (see Data Access Description, Sixth Count Summary Tape).
 - 1. Geographical areas represented: Metropolitan counties, nonmetropolitan counties of 50,000 or more population, cities of 100,000 or more, and SMSA's.
 - 2. Data tabulated: The same sample population items as for printed reports, but using more extensive cross-tabulations by age, sex, race, and other characteristics. Data shown for Negro and Spanish-American.

1970 Housing Census Data

I. First Count Data

A. Printed Reports: An Advance Report of housing data for each State is planned for the fall of 1970. Most 100-percent housing characteristics, drawn from the First Count, would be printed for the State, SMSA's, and places of 10,000 or more, and counties.

Complete-count (100-percent) housing data for Housing, Vol. I, and "Census Tract Reports" will be drawn from second count tabulations (see II below).

- B. Summary Tapes (see Data Access Description, CT-2, First Count Summary Tape.)
 - 1. Geographical segments represented: States, counties, Congressional Districts, minor civil divisions or census county divisions, places, and enumeration districts or blockgroups.
 - 2. Data tabulated: Among the items included are housing units by number of rooms, persons per room, number of units with basement, value of owner-occupied units (eight value categories), contract rent (nine rent categories), plumbing facilities, and crowded units by type of household.

II. Second Count Data

- A. Printed Reports (Census of Housing, Vol. I, Chapters 2-55; and "Census Tract Reports"). (See tables 3 and 4.)
 - 1. Geographical areas represented: (1) In Housing: States by urban-rural and SMSA--non-SMSA; SMSA's and component parts, urbanized areas; places of 1,000 and more; and counties; (2) in "Census Tract Reports": SMSA's, counties, places of 25,000 or more population, and tracts.
 - 2. Data published: See table 3. The 100-percent items listed in that table are drawn from the Second Count tabulations.
- B. Summary Tapes (see Data Access Description, CT-3, Second Count Summary Tape).
 - 1. Geographical areas represented: States, SMSA's, urbanized areas, counties, places, minor civil divisions or census

- county divisions, and tracts. Also urbanrural designations for states, SMSA's and counties.
- 2. Data tabulated: Subjects tabulated are the same as for Housing, Vol. I reports. Greater detail is often available. For example, there are 14 cash rent ranges rather than 10 as in the printed reports. Also, tapes include such tabulations as owner-occupied units by household type and race of head for five value ranges, and owner-occupied units by number of rooms and race of head for five value ranges. Most Second Count summary tape items are cross-tabulated by tenure for total and Negro.

III. Third Count Data

- A. Printed Reports (Census of Housing, Vol. III, "Block Statistics,"). (See table 5.)
 - 1. Geographical areas represented: Blocks and tracts within urbanized areas and within other areas that have contracted for block statistics.
 - 2. Data published: See tables 5 which presents the planned outline for tables 1 and 2 of "Block" reports. Also shown is the outline for the tables which will appear in the reports for the contract block areas.
- B. Summary Tapes (see Data Access Description, CT-4, Third Count Summary Tape).
 - 1. Geographical areas represented: Blocks and tracts within urbanized areas and within other areas that have contracted for block statistics.
 - 2. Data tabulated: In addition to data items found in printed reports, the block tape includes such data as number of units with 1, 2, 3, 4, 5, 6 or more rooms; total number of rooms in total, and Negro-owned and rented units; number of units with 1, 2, 3, 4, 5, 6 or more persons; and total number of persons in total, and Negro-owned and rented units.

IV. Fourth Count Data

A. Printed Reports (Census of Housing, Vol. I, Chapters 2-55; and "Census Tract Reports"). (See tables 3 and 4.)

- 1. Geographical areas represented: (1) In Housing: States by urban-rural non-farm-rural farm and SMSA--non-SMSA; SMSA's and component parts, urbanized areas; places of 2,500 and more; and counties; (2) In "Census Tract Reports": SMSA's, counties, places of 25,000 or more population, and tracts.
- 2. Data published: See tables 3 and 4. Spanish-American data are presented in a pattern similar to that for Negroes. However, no 5-percent sample data for places 2,500 to 10,000 are given for Spanish-American.
- B. Summary Tapes (see Data Access Description, CT-5, Fourth Count Summary Tape).
 - 1. Geographical areas represented: States, SMSA's and component parts, counties, places, minor civil divisions or census county divisions, and tracts. Also urban, rural nonfarm-rural farm designation.
 - 2. Data tabulated: The summary tapes include a number of tabulations not found in the printed reports, such as: gross rent by number of rooms, value of owner-occupied unit by income, and plumbing facilities by household composition and age of head. Most data are tabulated by tenure for total, Negro, and Spanish-American.

V. Fifth Count Data

- A. No printed reports will be derived from this file.
- B. Summary Tapes (see Data Access Description, CT-6, Fifth Count Summary Tape).
 - 1. Geographic areas represented: 5-digit level ZIP areas in SMSA's, and 3-digit level elsewhere.
 - 2. Data tabulated: Tenure and vacancy status, plumbing facilities, gross rent, value of property, telephone available, year structure built, automobiles available, rent-income ratios, and household equipment items.

VI. Sixth Count Data

A. Printed Reports (Census of Housing, Vol. II, Chapters 2-55, "Metropolitan Housing").

- 1. Geographical areas represented: SMSA's, central cities, and places of 50,000 or more.
- 2. Data published: Cross-tabulations by principal housing and household subjects such as value of property, gross rent, income, plumbing facilities by persons per room, number of rooms, number of units in structure, and size of household.
- B. Summary Tapes (see Data Access Description, Sixth Count Summary Tape to be published).
- 1. Geographical areas represented: SMSA's, central cities, places of 50,000 or more, metropolitan counties, and non-metropolitan counties of 50,000 or more population.
- 2. Data tabulated: Extensive cross-tabulations including many "three-way" crosstabulations such as household composition by age of head, by year structure built, and by value of property. Most of the data are tabulated by tenure and for Negro and Spanish-American households.
